### About the Seminar:

The seminar topic is “**Environmental Auditing**”, which is the very useful and required item now a day for all the educational institutes. In view of its importance, It becomes necessary to aware the students about it. Students realized that what environmental facilities need to be crated to protect and conserve the ecosystem. They came to know about the key indicators for sustainable development. Students understood the importance, needs and methods of conserving water, energy, managing solid waste and others. More than 100 students attended the seminar and learned about that what area need to be checked for conducting the environment audit in educational institutes. It was very important and useful seminar.
